

What is Claimed Is:

1. A device for carving into a carrot comprising a handle having a first end and a second end, said handle having at least one blade extending from said first end, said blade operatively arranged to carve into said carrot.
2. The device for carving into a carrot recited in Claim 1, wherein said blade has at least one sharp cutting edge.
3. The device for carving into a carrot recited in Claim 2 wherein said blade is U-shaped.
4. The device for carving into a carrot recited in Claim 2 wherein said device is used to carve said carrot into a shape of a stalk of celery wherein said blade is contoured in said shape of said stalk of celery.
5. The device for carving into a carrot recited in Claim 3 wherein said blade is disposed at a right angle relative to said handle.
6. The device for carving into a carrot recited in Claim 5 having a ring affixed to said second end of said handle.
7. The device for carving into a carrot recited in Claim 6 having at least one groove operatively arranged as a thumb grip proximate said first end of said handle.
8. The device for carving into a carrot recited in Claim 7 wherein said handle includes a tapered center portion.
9. A device for carving into a carrot comprising:  
a handle having a first end and a second end;

at least one blade extending from said first end of said handle disposed at a right angle to said handle, wherein said blade is U-shaped having at least one sharp cutting edge operatively arranged to carve into said carrot;

a ring affixed to said second end of said handle;

at least one groove operatively arranged as a thumb grip proximate said first end of said handle.

10. The device for carving into a carrot recited in Claim 9 wherein said handle has a tapered center portion.

11. The device for carving into a carrot recited in Claim 10 wherein said handle has a head attachment and said blade is mounted to said head attachment.
